What Regulation Drives Content

- National Oil and Hazardous Substances Pollution Contingency Plan (NCP), Subpart C Planning and Preparedness
 - Sec 300.205 Planning and Coordination Structure
 - Sec 300.210 Federal Contingency Plans
 - Sec 300.211 OPA Facility and Vessel Response Plans
 - Sec 300.215 Title III Local Emergency Response Plans

What is in Them

- **Background Information**
 - Specific background information is vital for helping clean-up personnel make reasonable, well-informed choices about how to contain and clean up a spill
- **Spill Scenarios**
 - Address the different combinations of factors like weather conditions, geographic isolation, and spill size, that can affect the ability of response personnel to contain and clean up an oil spill.
 - Contingency plans to reflect several different scenarios.
- **Response Actions**
 - Describe major actions that need to be undertaken when a spill occurs.

Who Writes Them

- Joint Response Team
- Regional Response Team
- Area Committees (coordinated with CUPAs)
- Facilities (coordinated with CUPAs)
